## Merry Christmas for the Prairie Employees

The local officials of the Prairie Oil & Gas Co. have returned from a conference held at Independence, Kan., where all the heads of departments in Oklahoma, Kansas and Texas met with the managing officers and had a splendid time together on Tuesday of this week, at which time the work and activities of the company were discussed and plans exchanged.

At the close of the meeting, a most important announcement was made that at the recent annual meeting, the stockholders of the company, on the recommendation of the directors, established a permanent retirement plan, which will enable every employee, no matter what position, who has been with the company for a year or more, to retire at the age of 65, or earlier, if desired, on the basis of his length of continuous service.

## One Great Christmas Present Tulsa Might Find in Her Stocking

Tulsa people are deserving something this Christmas that is out of the ordinary. There is one present that may appear about Christmas day, that would insure the city of Tulsa a prosperity in a manner far beyond the hopes and aspirations of her townsmen. It is a new railroad connecting with the U. R. T. at Sapulpa 14 miles across the country to the branch of the southwestern railroad, running directly north and up Chicken creek, from Slick, and then with the line completed from Nyrka to Okmokee and all electrified—wouldn't this be some present?

The southwestern road follows the Deep Fork southeast from Bristow, and is running through the richest oil-producing fields of the country, with such a line is a mighty good town as it is now; and Nyrka is bound to be a better town as the oil fields are developed; and to Oklahoma, where it is uncertain as to whether it is a blessing or a curse, and certainly no great gift of imagination is required to understand that this would be the greatest boost for this city of Tulsa, and could possibly happen. It is the one best bet, and who shall say that it will not happen before Christmas is over?

## Gypsy Deep Test Showing for Oil

The Gypsy Oil company's No. 4 well on the De Noya tract in the northwest of 5-26-6, Durbank pool, is reported to be flowing at 2,500 feet with a hole full of oil.

## New Strike in Kansas Attracting Attention

GREENWOOD, Kan., Dec. 22.—The Merriam & Flanders strike on the Jordan farm, about two miles southeast of the town of Sever, Kan., and just west of the Greenwood county line in Elk county, the location being in the northwest corner of the northeast of 23-23-13, is attracting considerable attention. The land was picked up at about 1,200 feet, and drilled into about one acre. The well is estimated at 100 barrels, and the oil has a gravity of 28. The well is reported to be flowing at 2,500 feet with a hole full of oil.

## Wilcox Oil & Gas Co. Completing Good Well

The H. F. Wilcox Oil & Gas company's No. 1 on the Sarah Jane Hendrickson farm in the northeast corner of the northwest of 18-16-9, south of Kellyville, has the top of the Dutchman in the well is flowing at the rate of 400 barrels per day. The same company is building a rig for No. 2 same farm in the southeast corner of the northwest of section 28.

## Wilcox Company Deepening Good Well

The H. F. Wilcox Oil & Gas Co. is deepening its No. 2 Bruner in the northeast corner of the northwest of 18-16-9, south of Kellyville, about two feet today and expects to at least double production. This well has been in for several weeks and has settled down to 250 barrels daily actual gauge, at but four feet in the Dutchman sand.

## Southwest of Muskogee

J. A. DeWitt has a 75-barrel producer in No. 4 D. Harrison farm in the southwest of 17-26-6, Sand creek pool, 1,750 to 1,750 feet. L. Edwards' No. 1 Reid farm in the northwest of 18-14-9, is dry and abandoned at 1,100 feet.

## In the Kansas Fields

In Coffey county, Kansas, the Winkler interests' No. 1 Elliott, in the southwest of 17-23-13, is making 75 barrels after a 300-quart shot. Sand was picked up at 1,795 feet and they have 30 feet of it.

## In Greenwood County, The

Olney company's No. 3 Young in the southwest of 17-23-13, is good for 20 barrels in the 1,800-foot sand. Willard and others' test on the Grundy farm, in the northwest of 17-27-11, is making 30 barrels at 1,274 feet from the 1,895 to 1,924-foot sand.

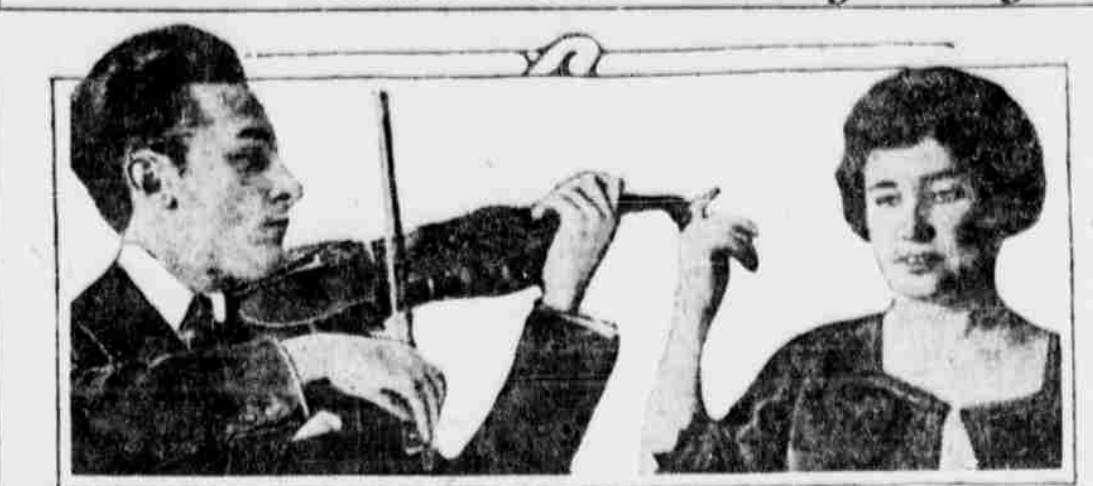

## Greeves & Foster's test on the

Drum farm, in the southwest of 21-26-6, is a failure at 1,175 feet. In Woodward county, Kansas, R. G. Gillespie has a 30-barrel producer after a 30-quart shot in his No. 4 Dinning farm, in the southwest of 22-23-13. The sand was west of 1,655 to 1,710 feet.

## The Oklahoma Producing & Re-

fining company is drilling a well on the south line of the southwest of 23-23-13, is a rig up for No. 2 Barnett in the center

# Helen Keller "Hears" Strains of Star's Violin Through Fingers

Helen Keller holding her finger tips on Jascha Heifetz's violin as he plays.

Helen Keller, deaf and blind marvel, now boasts of the distinction of having had a concert staged for her individual benefit. During the recent visit in Denver of Jascha Heifetz, celebrated violinist, he was introduced to Miss Keller. He offered to play for her. As he played she held her finger tips on the keys of his instrument and "read" the notes he played.

finding Corn has a 50-barrel well after a shot of 60 quarts in the 1,855-foot sand in No. 5 Stevenson farm in the northeast of 24-24-14.

Butler county, Kansas, the Lewis oil company's Moller farm No. 2 in the northwest of 24-29-6, has the sand from 2,780 to 2,905 feet and the well is making 250 barrels daily. The same company's No. 2 on this farm is also a 230-barrel producer.

Neilly Brothers' No. 1 Covert farm in 10-28-5, is a duster at 2,840 feet.

In the Osage, The Clover Oil company has a rig up for No. 7 in the southeast corner of the northwest of 21-22-12.

The Midland Oil company has a rig up for No. 4 in the northeast corner of the southeast of 21-22-12.

The H. F. Wilcox Oil & Gas Co. is also putting a rig across the line in 22-11-12, the location being in the southeast corner of the southeast of section 32.

The McMan Oil company, which has purchased several tracts in this vicinity, has made several locations, and is putting a rig for No. 1 in the northwest of the northeast of 5-10-12.

The Kingwood Oil & Gas Co. is drilling at 400 feet on its test off setting at the Stover and associates' big producer.

The Prairie Oil & Gas company has a rig moving in for a test in the northwest corner of the southwest of 4-10-12, beyond other companies are said to be making locations for tests, and prices for acreage are said to be sky high in this vicinity.

## Another Good Well at Kellyville

D. D. Mickelson's No. 2 Jacke Brown farm, in the east half of the northeast of 20-17-10, Kellyville district, good sand was only plugged at 2,450 feet and has a showing for a nice well. They still have 250 feet of open hole and the well is caving so badly that it is uncertain as to whether it is a blessing or a curse, and certainly no great gift of imagination is required to understand that this would be the greatest boost for this city of Tulsa, and could possibly happen. It is the one best bet, and who shall say that it will not happen before Christmas is over?

The southwestern road follows the Deep Fork southeast from Bristow, and is running through the richest oil-producing fields of the country, with such a line is a mighty good town as it is now; and Nyrka is bound to be a better town as the oil fields are developed; and to Oklahoma, where it is uncertain as to whether it is a blessing or a curse, and certainly no great gift of imagination is required to understand that this would be the greatest boost for this city of Tulsa, and could possibly happen. It is the one best bet, and who shall say that it will not happen before Christmas is over?

## Waite Phillips Brings in Big Well at Bald Hill

Waite Phillips is inside the pay at his well with the biggest well again with perhaps the biggest well in the district. The well is located at the center of the west line of the southeast of the southwest of 22-15-14, Bald Hill district, which is flowing at the rate of 400 barrels per hour from the top of the pay sand found at 2,198 feet. While the initial flow of this big operation approximates something like 1,000 barrels, Mr. Phillips conservatively estimates it at 800 barrels when completed.

## Lyons & Deaneer Pools

The Prairie Oil & Gas company has a rig up for No. 1 Sears in the southeast corner of the southeast of 1-11.

The Indian Petroleum company is rigging up for No. 7 in the northwest corner of the southwest of 12-11-11.

The Gypsy Oil company is rigging up for No. 1 Jeffers in the southeast corner of the northeast of the southwest of 13-11-11.

The W. Phillips No. 1 Jefferson, in the southwest corner of the southwest of the southeast of 13-11-11 is a rig.

Gladys Belle Oil company has a rig up for No. 1 Holmes in the southwest corner of the southeast of the southwest of 13-11-11.

W. Phillips has a rig up for No. 1 Holmes in the southeast corner of the southwest of the southwest of 13-11-11.

The Terra Okla. No. 2 Holmes in the southeast corner of the northeast of the southeast of 13-11-11 is a rig.

Deaneer & Jamison have a rig up for No. 1 Tucker in the southeast corner of the northeast of the southwest of 13-11-11. No. 1 located in the northwest corner of the southwest of the southeast of 13-11-11 is also a rig.

The Edgar Oil company has a rig up for No. 13 Jefferson, in the southwest corner of the northeast of the southwest of 13-11-11.

The W. Phillips No. 1 Jefferson, in the southwest corner of the southwest of the southeast of 13-11-11 is a rig.

The Storm & Hegwer No. 1 Likowski, in the southwest corner of the northeast of the southwest of 23-11-11, has the sand from 2,062 to 2,090 feet, and is good for 3,000 feet of gas.

The Independent Oil company is rigging up for No. 2 Fields in the northeast corner of the southeast of the northeast of 24-11-11.

The Lyons Petroleum company is rigging up for No. 1 Fields, in the northwest corner of the northeast of 24-11-11. No. 2 in the center of the northwest of the northeast of 24-11-11, is a rig.

The Henry Oil company has a rig up for No. 1 Barnett, in the southeast corner of the southwest of 23-11-11.

The Oklahoma Central has a rig up for No. 3 Barnett in the center

of the south line of the southeast of 23-11-11.

The Texas company is rigging up for No. 2 Barnett, in the southeast corner of the southwest of 23-11-11.

The Carter Oil company has a rig up for No. 4 Rogers, in the southeast corner of the southwest of 23-11-11.

The Kawfield Oil company has a rig up for No. 1 Sewell, in the southwest corner of the southeast of 4-10-12.

The Texas company is rigging up for No. 3 Rodgers, in the southeast corner of the southwest of 4-10-12.

The Selby Oil company has a rig up for No. 10 Jacobson, in the southeast corner of the northeast of 19-15-10.

The Southwest Petroleum company has a rig up for No. 1 Pomeroy, in the southwest corner of the northeast of 17-15-10.

The Indehanna and Hawsatha Oil company has a rig up for No. 15 Clinton, in the southwest of the southwest of 13-15-10.

The Prairie Oil & Gas Co. is rigging up for No. 2 Trent, in the northeast corner of the southeast of the southwest of 13-15-10.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the southwest of 23-23-11, is good for 2,600,000 feet of gas at 2,142 feet.

The Hazlett No. 10, in the center of the south line of the
